

PARKWAY MEDICAL CENTRE

MISSION STATEMENT

Parkway Medical Centre, and all those who work within, is committed to treating everyone as an individual, without discrimination for any reason. We will plan care which emphasises the individual needs of our patients, and always respect their dignity and their right to confidentiality.

We are absolutely committed to the delivery of high standards of care by appropriately trained healthcare professionals, following current professional guidelines to offer advice, support and information in order to help our patients make the right choices for their health.

We aim to provide this in a friendly, welcoming environment that supports both staff and patients alike, and will undertake reviews in the form of surveys and audits to demonstrate how we meet good standards of care.

We are a training practice striving to share our aspirations and achievements with future generations of students, doctors and nurses.
